

SCOTT A. LAGRECA

Department of Biology, Box 90338, 130 Science Drive
Duke University, Durham NC 27708-0338 USA

scott.lagreca@duke.edu
919-613-6112

PROFESSIONAL EXPERIENCE

Duke University

Collections Manager, Lichens

- Manage and develop a collection of over 160,000 lichen specimens, including accessions, gifts and loans.
- Maintain a database of lichen specimens using Specify 6.
- Oversee work-study students in preparation and georeferencing of lichen specimens.
- Answer inquiries and help visitors from the scientific community and the general public, including thin-layer chromatography of lichen specimens.
- Perform phylogenetic, taxonomic and floristic research on lichens.

Durham NC

October 2017 – present

Cornell University

Curator of the Plant Pathology Herbarium

- Manage a collection of about 400,000 fungus and lichen specimens, including all filing and loan records.
- Develop and maintain database of fungus and lichen specimens using Specify 6.
- Develop collections policies and plans for an entire herbarium.
- Oversee workflow and data entry for three NSF ADBC grant-funded projects, and data management for one NSF DBI award.
- Assist visitors and answer inquiries from the scientific community and the general public. Create outreach programs and exhibition materials for the general public.
- Perform taxonomic and floristic research on fungi and lichens.

Ithaca NY

April 2011 – September 2017

Berkshire Museum

Natural Science Coordinator

- Curate permanent natural history galleries and special exhibitions.
- Plan and deliver interpretive natural science programming for school groups and the general public.
- Manage a diverse collection of 15,000 natural history objects including shells, minerals, birds, insects, mammals, and plants.
- Assist with the care and feeding of live animals (aquarium and vivarium)

Pittsfield MA

August 2008 – March 2011

New York State Museum

Volunteer (unpaid position)

- Help with curation and identification tasks in a collection of 20,000 lichen specimens.
- Perform taxonomic and floristic research on lichens.

Albany NY

September 2007 – March 2011

The Natural History Museum

Curator of Lichens

- Manage a collection of 400,000 natural history specimens, including all filing and loan records.
- Assist with exhibitions and interpretive programming.
- Assist visitors and answer inquiries from the government, the scientific community and the general public.
- Perform taxonomic and floristic research on lichens.

London UK

June 2004 – March 2008

Acting Manager of the Cryptogamic Herbarium

April 2006 – September 2007

- Develop collections policies, and space allocation/usage, for the cryptogamic herbarium (algae, pteridophytes, bryophytes, lichens and myxomycetes).
- Supervise three botany curators.

Harvard University

Curatorial/Research Associate, Farlow Herbarium

Cambridge MA

January 1998 – May 2004

- Manage a large collection of natural history specimens, including all filing and paperwork.
- Manage work experience students and volunteers, assist visitors, and answer inquiries.
- Perform taxonomic and floristic research on lichens.

James Madison University

Visiting Assistant Professor, Department of Biology

Harrisonburg VA

Fall 1997

- Teach courses in General Botany (lectures) and Molecular Biology (labs).

Smithsonian Institution Botany Department Intern, National Museum of Natural History	Washington DC Summer 1991
Boyce-Thompson Institute for Plant Research Plant Taxonomist	Ithaca NY Summer 1990
Cornell University Curatorial Assistant, L.H. Bailey Hortorium	Ithaca NY January 1989 – May 1991

EDUCATION

Doctorate (Ph.D.) Botany	Duke University May 1997
Bachelors (B.S.) Plant Science	Cornell University May 1991

SELECTED PEER-REVIEWED PUBLICATIONS

- Cristóbal, I., P. Juraj, E. Lagostina, S. LaGreca, S. Leavitt, L. Muggia, Z. Palice, S. Pérez-Ortega, and C. Printzen. In press. Whole genome amplification as an innovative approach for genomic studies in lichenized fungi. Submitted to: IMA Fungus. [<https://doi.org/10.21203/rs.3.rs-1725113/v1>]

LaGreca, S. The history of lichenology in Britain, and the BM collections. Department of Botany, The Natural History Museum, London, UK, 2006 [talk].

RECENT COURSES TAUGHT

LaGreca, S. Crustose Lichen Workshop (a New York Flora Association workshop). Cornell University, Ithaca, NY. October 6-7, 2012.

LaGreca, S. & Lumbsch, H.T. Spot tests and TLC in lichen identification. Humboldt Field Research Station, Steuben, Maine. June 6-12, 2010.

LaGreca, S. An introduction to the lichens of New England. High Pond Farm, Plymouth, NH. September 12-14, 2008.

SOCIETIES

American Bryological & Lichenological Society (role: Editor for the journal *Evansia*)
British Lichen Society
Eastern Lichen Network

Friends of the Farlow
Finger Lakes Native Plant Society
International Association for Lichenology (role: IAL Secretary)
New York Flora Association

AWARDS AND GRANTS

Bermuda Zoological Society, Research Funding for "Molecular phylogenetic evaluation of endemic Bermudian lichen species", December 2019 [\$2,200]

Bermuda Zoological Society, Research Funding for "Revision of the lichen flora of Bermuda: evaluation of endemic Bermudian lichen species", May 2017 [\$1,736]

Field Museum, Visiting Scholarship for "Molecular systematics of the lichen genus *Ramalina* (Ramalinaceae) with an emphasis on the *Ramalina siliquosa* complex", May 2014 [\$1,625]

Bermuda Zoological Society, Research Funding for "Revision of the lichen flora of Bermuda: Walsingham Jungle", November 2007 [\$1,056]

Bermuda Biological Station for Research Inc., Grant-In-Aid for "Lichens as indicators of environmental health in Bermuda", August 2006 [\$1,656]

Harvard University, Friends of the Farlow Fellowship for "The species of *Ramalina* and *Usnea* in the R.H. Howe, Jr. Lichen Herbarium", September 2005 [\$2,405]

National Park Service, Research Contract for "A Bryophyte and Lichen Survey of the Boston Harbor Islands National Park Area", 2001-2002. [\$2,969]
